Summary

Full Stack Engineer with 3+ years of experience building scalable web applications using React.js, Next.js, and Node.js. Skilled in performance optimization, SSR, API development, and database integration, with a strong focus on clean UI and system reliability. Built and launched MaintainEase, a SaaS platform for housing society accounting, handling end-to-end development including billing workflows and data integrity. Integrated AI-driven features within the application to enhance user experience, automate processes, and improve operational efficiency.

Technical Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Material UI

Backend: Node.js, Nest.js, Express.js, REST APIs, GraphQL

Database: PostgreSQL, MongoDB

Tools: Redux Toolkit, Context API, Git, Figma

Core Competencies

Full Stack Development – API Design & Integration (REST, GraphQL) – Performance Optimization (SSR, Load Time Reduction) – Scalable Architecture – State Management (Redux, Context API) – UI/UX Implementation (Figma to Responsive UI) – Data Handling & System Reliability

Professional Experience

Skysoft IT Services Private Limited

March 2023 – Present

Full Stack Engineer

Noida, UP

- Built scalable web applications using React.js and Next.js, improving performance and code reusability.
- Implemented SSR for SEO-critical pages (PDP, PLP), improving crawlability and initial load performance.
- Translated Figma designs into pixel-perfect, responsive UIs using Material UI and Tailwind CSS.
- Integrated GraphQL APIs for dynamic, data-driven features and optimized component architecture, reducing page load time by 20%.

Key Projects

MaintainEase | Next.js, TypeScript, PostgreSQL, Prisma | SaaS Product | Website | Webapp

- Designed and built an end-to-end SaaS platform for housing society accounting, handling billing, payments, and financial tracking.
- Implemented audit-grade financial workflows including bill generation, payment tracking, and data integrity mechanisms.
- Developed role-based dashboards for admins and residents with real-time financial summaries.
- Architected backend data models and APIs to support scalable financial operations and reporting.
- Successfully onboarded and deployed the platform for a real housing society, validating the product in a live environment.

E-Commerce Platform | Next.js, TypeScript, Tailwind CSS, Redux Toolkit

- Developed a scalable Next.js application with consistent cross-device UX.
- Implemented Redux Toolkit for state management, reducing bugs by 15%.
- Migrated 13+ pages to SSR, improving SEO performance.
- Reduced page load time by 20% through frontend optimization.

Education

Full Stack Web Development

May 2022 – Mar 2023

Masai School

Bangalore, Karnataka

Bachelor of Computer Application

June 2020 – Feb 2023

Yashwantrao Chavan Open University

Mumbai, Maharashtra
